

CORPORATE AND PROFESSIONAL

Bronze has retained its position as an elegant & durable material against the onslaught of many new & modern challengers.

Bronze plaques, letters and sculptured crests can be used to great effect in professional and corporate premises. Company and professional association logos can be incorporated on plaques or created in two or three dimensional stand alone objects.

Cast bronze letters add prestige to a building. Letters can be created in almost any font, bold or condensed. Phoenix will manufacture any size to fit the space available.

Phoenix compositing staff can assist you in the creation of a bronze plaque, providing paper proofs of the artwork so they can be discussed with others involved with your organization. Phoenix also have a "create your own plaque" section on the Phoenix website where customers can design their own plaque & have it manufactured.
