

EDGES

Phoenix offers the following range of edges that may be used to compliment your plaque design.

The Rock and Wood Edges provide a sculptured look to the edge of your plaque. The width of these edges will vary with the size of marker required. Standard widths for these edges are 1" for markers 24" x 12" and less and 1.5" for markers over 24" x 12".

Rock Edge (set plaque sizes only)

Wood Edge (set plaque sizes only)

Other options include Plain Cut Edges (up to 1/4" depth), Straight Edges (19/32" depth) and Bevel Edges. We have two types of Bevel Edges: Plain Bevel and Elite Bevel. Plain Bevel Edges can be either painted or polished. Elite Bevel Edges are available in a painted finish only.

Plain Cut Edge (available in any plaque size)
(up to 1/4" depth)

Plain Bevel Edge (available in any plaque size)
(up to 1/4" depth)
(available with painted or polished bevel)

Straight Edge (set plaque sizes only)
(19/32" depth)

Elite Bevel Edge (set plaque sizes only)
(available with painted bevel only)

Detailed specifications of our Edge options can be found at:
www.phoenixfoundry.com/EdgeSpecs.shtml

Design Borders can be placed inside any of these edges as shown on the Elite Bevel Edge above, with the exception of the Plain Bevel Plaques. For a full list of border and edge options please visit our website.
