

LOCAL GOVERNMENT

Local Government, by its nature, is responsible for many functions in daily life. The construction of roads, bridges, sporting facilities & buildings combined with basic political activities often requires the permanent recording of events.

Cast bronze plaques find a major application in the cemetery & crematoria area. A very economical & durable monument can be created. Legal liabilities from ageing & tottering monuments can be avoided as can the expense of upkeep. The low profile of a bronze lawn memorial allows safe & economical operation of cemeteries & crematoria. Bronze plaques can also be added to existing monuments as an inexpensive way to create additional inscription or to save an old fading one.

Honour rolls & memorials can be created in bronze. Large numbers of names can be recorded. Plaques can be large & imposing or be manufactured with lettering the size of newsprint.

Phoenix can ease the difficulties of dealing with disparate groups of people by its plaque proofing service. Artwork can be created by our compositing staff, forwarded electronically to your office for approval before manufacture commences. Alternatively, a Phoenix designed system can be installed in your office, your staff trained & artwork generation controlled by yourself, the finished artwork is then sent electronically to Phoenix for manufacture.
