

# SCULPTURED BORDERS

This range of elegantly designed borders has been generated using a technical process that will enable them to be included on any size marker.

The Rock and Wood Borders provide a sculptured look to the edge of your plaque. The width of these borders will vary with the size of marker required. Standard widths for these borders will be 1" for markers 24"\*12" and less and 1.5" for plaques over 24"\*12".

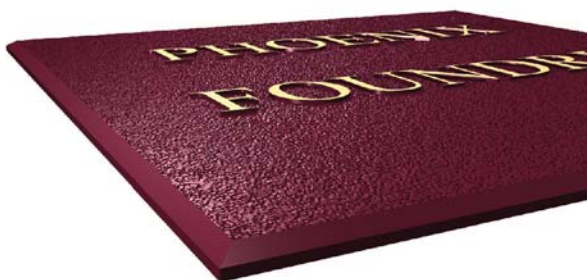

Rock

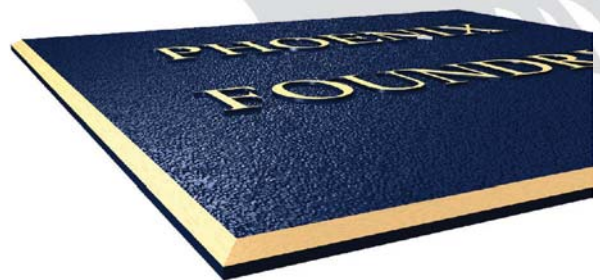

Wood

Bevel Edges on plaques can be either painted or lished. This range of borders is available on all sized plaques and bevel widths will be set to match existing ranges.
